Tips:

Alternate exercises: Feel free to change out any exercise as long as it belongs to that particular muscle group.

Rep: When an exercise has progressed through one complete range of motion and back to the beginning, one repetition has been completed.

Set: This is a series of reps done without rest.

Rest: Rest for 1 minute between each set.

Intensity level: Use a scale 1 to 10. **1** = sitting on the couch. **5** = mid-level exertion. **10** = max resistance while still using correct form.

Form: When handling any weight, you should concentrate on the primary muscle or muscle group you are using while lifting and lowering the weight slowly and deliberately.

Tempo: Use the count of 2 when exerting effort against resistance and a count of 4 when lowering the weight.
