<i>Actual</i>			
Exercise	# of Sets	# of Reps	Intensity Level

Tips:

Alternate exercises: Feel free to change out any exercise as long as it belongs to that particular muscle group

Rep: When an exercise has progressed through one complete range of motion and back to the beginning, one repetition has been complete

Set: This is a series of reps done without rest

Rest: Rest for 1 minute between each set

Intensity level: Use a scale 1 to 10. 1 = sitting on the couch. 5 = mid-level exertion. 10 = max resistance while still using correct form

Form: When handling any weight, you should concentrate on the primary muscle or muscle group you are using while lifting and lowering the weight slowly and deliberately

Tempo: Use the count of 2 when exerting effort against resistance and a count of 4 when lowering the weight

Notes:
